

Overview of the Main Menu

The main menu of the application is located at the top of the screen:

The screenshot shows the 'Проекты' (Projects) section of the application. The top navigation bar includes 'KOLMOGOROV', 'Проекты', 'Отчёты', 'Каталог', 'Расширения', 'Вкладки', and 'Создать'. A user profile 'Тимофей Прибылев' is visible in the top right. The main content area features a search bar, a 'Статус' dropdown set to 'Все', and a 'Метки' dropdown. Below this is a table of projects with the following columns: 'Название', 'Описание', 'Метки', 'Расписание', 'Сигнал', 'Последний запуск', 'Дата последнего запуска', and 'Дата создания'. The table contains 9 rows of project data, including 'max_demo_1', 'demo-18-10-24', 'demo-10-09-rb', 'demo-09-05', 'proj_demo_15_08', 'full_pd_validation', 'promo_metrics_proj', 'pd_model_proj', and 'ltv_model_proj'. Each row includes status indicators for the schedule and last run, and a signal indicator. A pagination bar at the bottom shows '9 элементов' and page numbers '1' and '10'.

Название	Описание	Метки	Расписание	Сигнал	Последний запуск	Дата последнего запуска	Дата создания

Descriptions of the menu sections and the functions available from these sections are provided below.

Below the main menu is a tab panel, where all previously opened pages of catalogs and objects are accessible.

Core Functionality

Projects

Catalog of existing (previously created) monitoring projects for model/data quality.

For each project, the following are available:

- basic information (name, description, status, creation date, etc.);
- list of input parameters (used data and metrics);
- schedule of runs;
- results of project execution (automatically generated dashboard and logs).

Reports

Catalog of user reports, which are compiled from the available results of monitoring projects (charts, scalar metric values, and traffic lights). Reports also allow including blocks with textual information, user images, and aggregated tables by monitoring projects.

Available [Export report to pdf file](#).

Catalog

The "Catalog" button opens a dropdown list with the following buttons:

- Data - [Catalog of datasets](#) available for calculations in monitoring projects.
- Templates - [Catalog of templates](#) for monitoring projects.
- Metrics - [Catalog of metrics \(tests\)](#) available for calculation in monitoring projects.
- Transformations - [Catalog of transformations](#) available for use in monitoring projects.
- Data sources - [Catalog of connections to data storage systems](#) available in the system.

Extensions

The "Extensions" button opens a dropdown list with the following buttons:

- Celery monitoring - administrative panel for viewing technical tasks over a period of time or a specific project run.
- Celery schedule - administrative panel for viewing the technical status of scheduled projects.
- Project comparison - page for comparing metrics from project runs.
- Calendar - page with a calendar for launching regular projects.

Tabs

The "Tabs" button opens a dropdown list with the following buttons:

- Add to favorites / Remove from favorites - button for adding the open tab to favorites or removing it from favorites.
- Close all tabs - button for closing all tabs.
- Favorites - dropdown list with favorite tabs.

Create

The "Create" button opens a dropdown list with the following buttons:

- Project - Page for [Creating a project](#) for monitoring model/data quality, or creating a template for such a project.
- Report - Page for [Creating a user report](#).
- Data - Page for [Creating a new dataset](#).
- Utilities - dropdown list with additional buttons:
 - Metric - Page for [Creating a new metric](#).
 - Transformation - Page for [Creating a new transformation](#).
 - Data source - Page for [Connecting a new data source](#).

This implies the user's selection of data for calculation, necessary metrics, and monitoring frequency, as well as (optionally) configuring the project's traffic light.

Additional Menu Functions

The menu also contains information about the availability of the Predicate server, the version of the tool, and additional settings.

Settings

Settings consist of a set of toggles for changing interface display parameters.

The following settings are available:

- Language: English or Russian - toggles the interface language.
- Theme: Light or Dark - toggles the color theme of the interface.

Log Out

Button for logging out of the system for the current user.
