

# Dataset Catalog

## Transition to the Dataset Catalog

The transition to the catalog of datasets registered in the system is done through the "Data" page, available in the navigation system.

Dataset catalog page:

The screenshot shows a web interface for a dataset catalog. At the top, there is a header with the word "Данные" and a "+ Добавить" button. Below the header is a search bar and several filter dropdowns labeled "Статус", "Владелец", and "Метки". The main content is a table with the following columns: "Название", "Описание", "Метки", "Дата создания", and an action column with a three-dot menu icon. The table contains five rows of data. At the bottom right, there is a pagination control showing "10 элементов" and page numbers "1", "2", "5".

Название	Описание	Метки	Дата создания	
test-new-impala	Пусто	Пусто	день назад	⋮
psql-small	Пусто	Пусто	4 дня назад	⋮
table-1100mb	Пусто	Пусто	5 дней назад	⋮
csv-1gb	Пусто	Пусто	5 дней назад	⋮
pd_transformed_data	Демо кейс PD: Данные о признаках	Пусто	5 дней назад	⋮

## Information Displayed in the Catalog

Column	Description
<b>Name</b>	The name of the dataset in the system. The parameter name of the form <i>Transformation_Name(dataset_name)</i> indicates that the dataset contains columns obtained by transforming another dataset.
<b>Description</b>	Detailed information about the content and purpose of the dataset.
<b>Tags</b>	Tags characterizing the type of data and its purpose (e.g., pd_validation, promo_metrics).
<b>Creation Date</b>	When the dataset was registered in the system.

Column	Description
<b>Action Menu</b>	Available by clicking on the three dots on the right side of the row.

## Catalog Management

✎ **Catalog Management Toolbar** ▼

- **Filters** - allow filtering transformations by various parameters:
- **Status** - filtering by the current state of the transformation.
- **All** - additional filtering options.
- **Tags** - filtering by assigned tags.
- **Owner** - searching by owner.
- **Search** - search bar for quick transformation searches.
- **Display Settings** - button to customize the appearance of the table.

By default, datasets in the catalog are sorted by registration date in the system - from newest to oldest.

To search for a dataset, enter a substring in the search field and press `Enter` or the magnifying glass icon.

Case sensitivity does not matter; the search occurs by the names of the datasets, the name, description, key of their corresponding data sources, as well as tags.

The catalog may contain more than one page. Page navigation buttons, as well as a button to set the number of objects per page, are available in the lower right corner of the screen form.

## Viewing and Creating Objects

To **add a new dataset**, click the "Add" button in the upper right corner of the dataset catalog window.

To **view information about a dataset** or perform other actions, click on the three dots on the right side of the corresponding dataset row.

For more information on registering new datasets, see the section "[Registering a New Dataset](#)".
