
Predicate - Share

General Description

Access to the file sharing page is done through the navigation path: *Extensions > Share*.

The "Share" page is designed for file sharing between users of the Predicate system. This section allows uploading, storing, and providing access to various files necessary for working with the system, such as JAR files of database connectors, configuration files, and other auxiliary materials.

File sharing page:

Key Functionalities

File Management

- **File Upload:** the ability to add new files to the shared storage
- **File Download:** obtaining files available in the system
- **File Deletion:** the ability to remove outdated or unnecessary files
