
Predicate Metric Parameters

Nº	Type Name	Type Parameterization
1	Dataset	<code>pandas.DataFrame</code>
2	String	1. Type: <code>str</code> 2. The parameter name does not contain the suffix <code>_column</code>
3	Integer	<code>int</code>
4	Float	<code>float</code>
5	Range of two floats	<code>Tuple[float, float]</code>
6	Boolean variable	<code>bool</code>
7	Dropdown of user-defined values	<code>Literal["option1", "option2", "option3"]</code>
8	Multi-select dropdown of user-defined values	<code>List[Literal["option1", "option2", "option3"]]</code>
9	Dropdown of dataset columns	1. Type: <code>str</code> 2. The parameter name contains the suffix <code>_column</code>
10	Multi-select dropdown of dataset columns	1. Type: <code>List[str]</code> 2. The parameter name contains the suffix <code>_columns</code>
11	Date	<code>datetime.date</code>
12	Time	<code>datetime.time</code>
