

Monitoring Results View

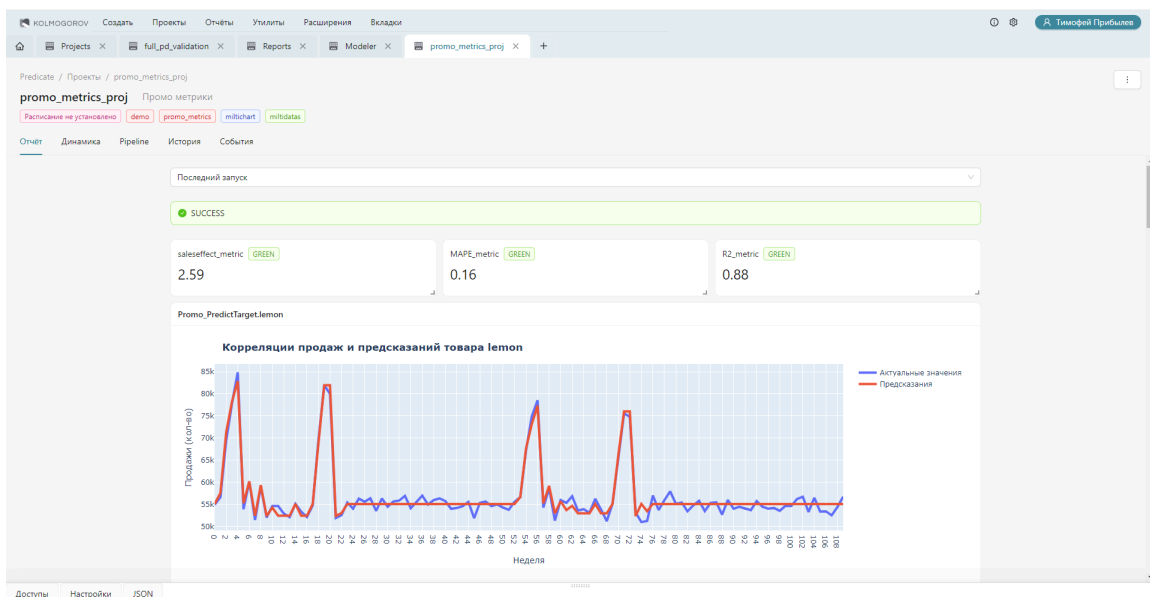

View the dashboard with the results of the project execution.

Navigating to the Project Page

On the project catalog page (*Dashboard > Projects*), select the desired project and double-click on it. The project page will open in a new tab of the application.

Project Page

The project report is presented below:

In addition to the project report with all graphs, scalar metric values, and project traffic lights, the project report also includes:

1. Project Dynamics – a graph showing the dynamics of scalar metric values over multiple executions of the project.
2. Pipeline – a diagram showing the order of node execution in the project.
3. History – information about the logs of node executions in the project.
4. Events – information about technical calls that occurred during project executions.
5. Access – a list of users and their access rights to the project.

6. Settings – information about traffic light rules and the project schedule.

7. JSON – a technical representation of the project in the form of a JSON object.

Additionally, each report provides access to view previous project executions using the project execution dropdown list.
