

Project Catalog

Transition to the Project Catalog

Access to the catalog of existing model/data monitoring projects in the system is done through the **Projects** tab in the top navigation panel. The project catalog page presents a table with information about available projects:

The screenshot shows the 'Проекты' (Projects) page. At the top right is a '+ Добавить' (Add) button. Below it are search and filter controls for 'Статус', 'Владелец', and 'Метки'. The main table has the following data:

Название	Описание	Метки	Расписание	Сигнал	Последний запуск		Дата создания	
					Статус	Дата		
impala-pr	Пусто	Пусто	Отсутствует	Пусто	⊙ SUCCESS	день назад	день назад	⋮
psql-small-pr	Пусто	Пусто	Отсутствует	Пусто	⊙ SUCCESS	4 дня назад	4 дня назад	⋮
table-1200mb-pr	Пусто	Пусто	Отсутствует	Пусто	⊙ ERROR	день назад	5 дней назад	⋮
big-csv-pr	Пусто	Пусто	Отсутствует	Пусто	⊙ SUCCESS	5 дней назад	5 дней назад	⋮
test-template-prj	Простая проверка работы шаблонов	Пусто	Отсутствует	Пусто	⊙ SUCCESS	5 дней назад	5 дней назад	⋮

At the bottom right, there is a pagination control showing '9 элементов' and page numbers '1', '2', and '5'.

Information Displayed in the Catalog

Column	Description
Name	Project name. Specified by the user when creating the project. Must be unique
Description	Project description. Specified by the user when creating the project
Tags	Tags indicating project characteristics, with indicators of quantity (e.g., +3)
Schedule	Information about the project schedule (set/not set, active/paused)
Signal	Result of the rule calculation over the project's scalar metrics (traffic light)
Last Run	Status of the last project run (SUCCESS, ERROR)

Column	Description
Last Run Date	When the project was last run
Creation Date	Date the project was created in the system

Possible Project Signal Values (Traffic Light)

Value	Description
GREEN	According to the rule, the project completed with a good result
YELLOW	According to the rule, the project completed with a satisfactory result
RED	According to the rule, the project completed with an unsatisfactory result
Empty	No traffic light value (either the traffic light was not used in the project, or the rule has not yet been calculated)
ERROR	Error in calculating the traffic light (e.g., one of the metrics used in the rule was not calculated)

For more details on traffic lights, see the section "[Project Traffic Light](#)".

Possible Project Statuses

Status	Description
SUCCESS	The last project run was successful
ERROR	Error during project execution
ACTIVE	The project is active and runs on schedule
PAUSED	The project is paused

Catalog Management

 **Catalog Management Toolbar** 

- **Filters** - allow filtering transformations by various parameters:
- **Status** - filtering by the current state of the transformation
- **All** - additional filtering options
- **Tags** - filtering by assigned tags
- **Owner** - search by owner
- **Search** - search bar for quick transformation searches
- **Display Settings** - button to configure the appearance of the table

To search for a project, enter a substring in the search field and press `Enter` or the magnifying glass icon. Case does not matter; the search occurs by project name and description, as well as by tags.

The catalog may contain more than one page. Page navigation buttons, as well as a button to set the number of objects per page, are available in the bottom right corner of the screen form.

Project Schedule

Projects can have the following schedule statuses:

- **Schedule not set** - displayed for most projects
- **ACTIVE** - active schedule
- **PAUSED** - schedule on pause
- **Daily** - project runs every day
- **Weekly** - project runs once a week
- **Monthly** - project runs once a month

Viewing and Creating Objects

To **view general information about the project** and **results of the project's metric calculations**, hover the cursor over the menu icon (three dots) on the right in the corresponding project row and select the desired action.

To **add a new project**, click the "Add" button in the upper right corner of the project catalog window.

For more details on project results, see "[View Monitoring Results](#)".

For more details on creating projects, see the section "[Creating a New Project](#)".
